

At McIlwain Mobility, we are committed to helping you and your loved ones, continue to live safely and independently in your home. We strive to bring you the latest products and innovative solutions for your individual needs and that's why we're very pleased to have partnered with Electronic Caregiver of Sacramento.

Electronic Caregiver (ECG for short), offers stylish, easy to use, wearable devices that allow you to reach an emergency operator in seconds, who knows who you are, where you are and your specific health/emergency needs. It's so much more than that, however. Personalized services include medication reminders, 24/7 access to doctors by phone, a cell-phone application for family connectivity and more! You really need to see it to know how much help it can be to have a device like this.
